

Justin Wheeler

SDEV 300

October 15, 2016

User is promoted with a registration screen.

The screenshot shows a Mozilla Firefox browser window with the title 'Create Student'. The address bar displays 'localhost/week4/InsertApp.php'. The page content includes a heading 'Enter New User' and a subtext 'Complete the information in the form below and click Submit to create your account. All fields are required.' Below this is a registration form with three input fields: 'Username' (containing 'AGuy'), 'Password' (containing '8091111'), and 'Email' (containing 'gtx@gmail.com'). A 'Submit' button is located at the bottom of the form. The background of the browser window shows a code editor with PHP code snippets.

Create Student - Mozilla Firefox

Create Student x New Tab x +

localhost/week4/InsertApp.php

Google

### Enter New User

Complete the information in the form below and click Submit to create your account. All fields are required.

Username:

AGuy

Password:

8091111

Email:

gtx@gmail.com

Submit

```
rt.php (/var/www
Save
deleteProduct
ds
ion setUserna
ame = $myuser
ion setPasswo
ord = $mypass
ion setHost (
= $myhost;
ion setDb ($m
$mydb;
rms class
```

form.html

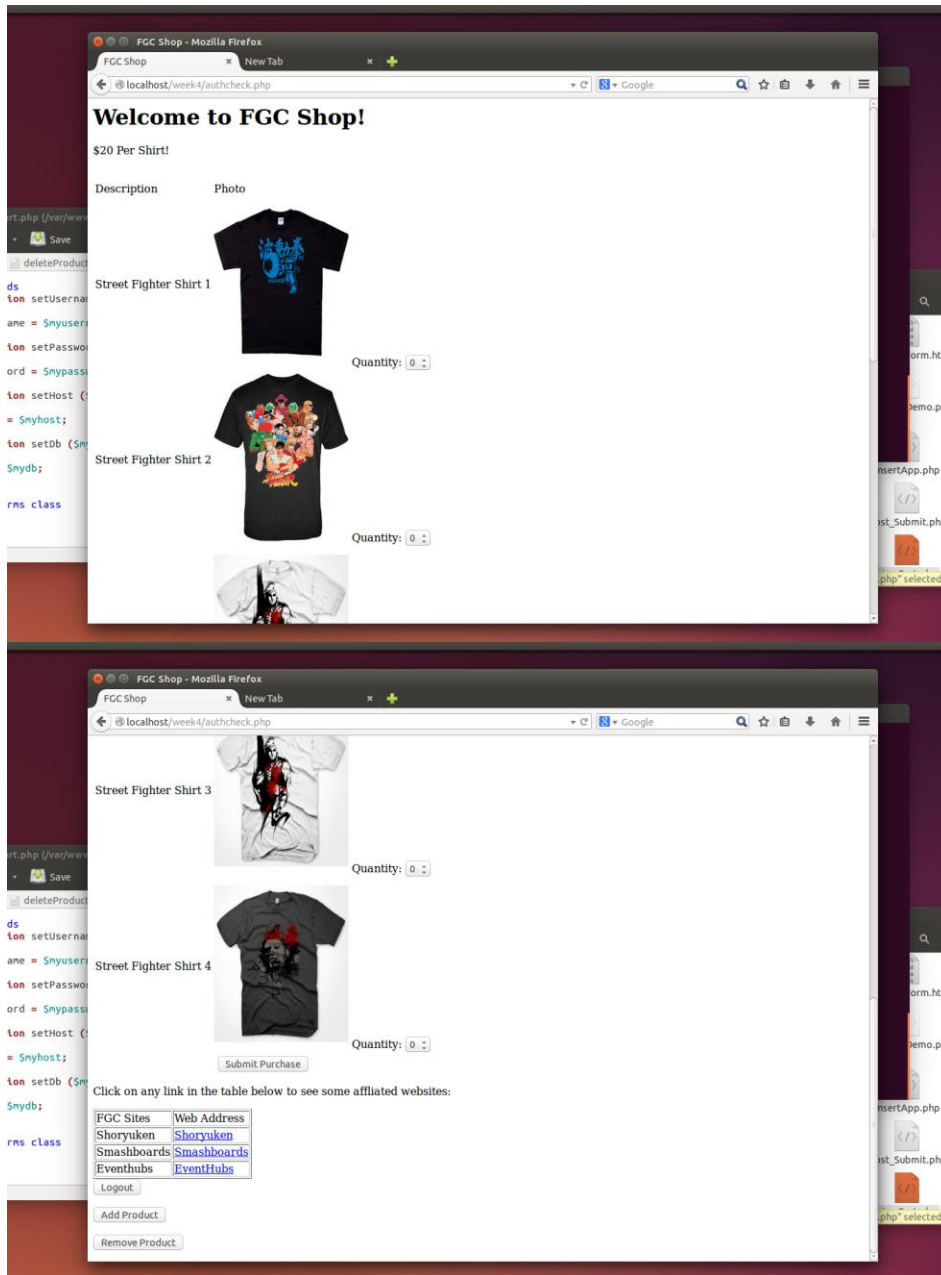

demo.php

InsertApp.php

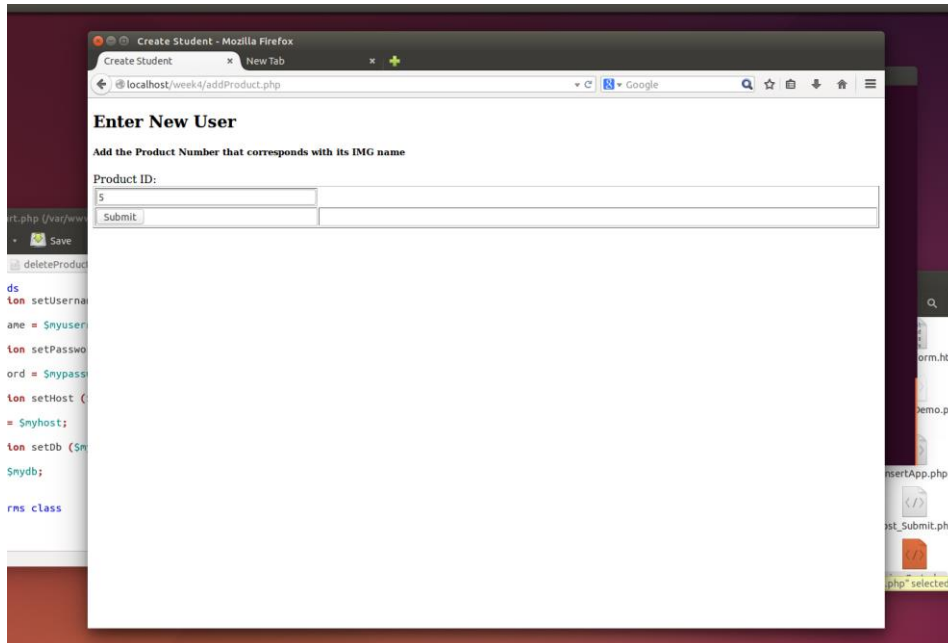

st\_Submit.php

php" selected (

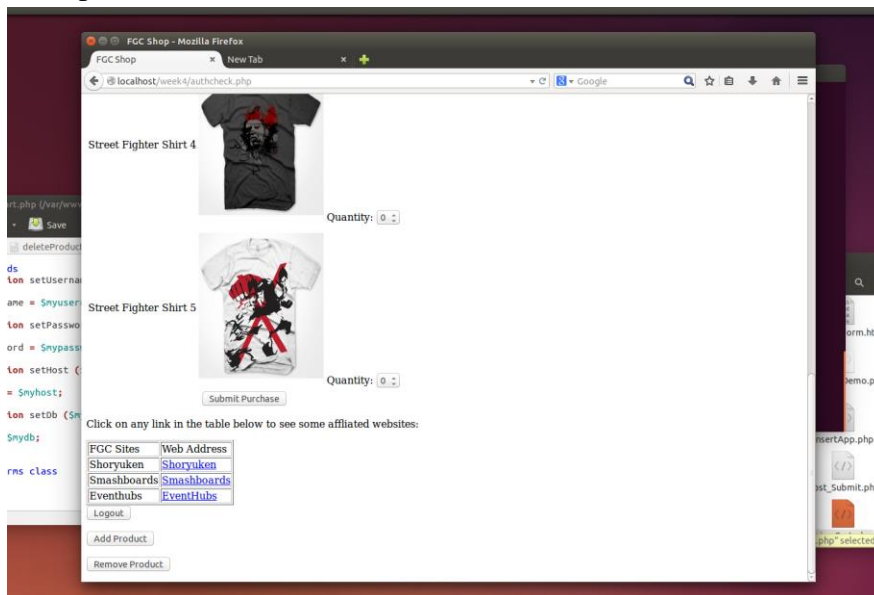

Currently only 4 shirts are available.

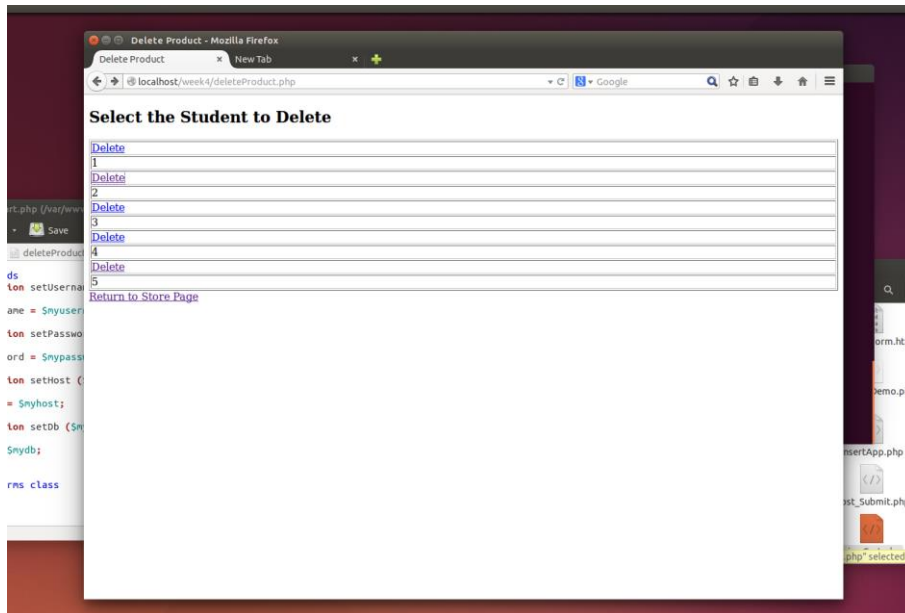

I put the image for the 5<sup>th</sup> product in a folder /images/\_ .jpg and they load according to their productID in the database.

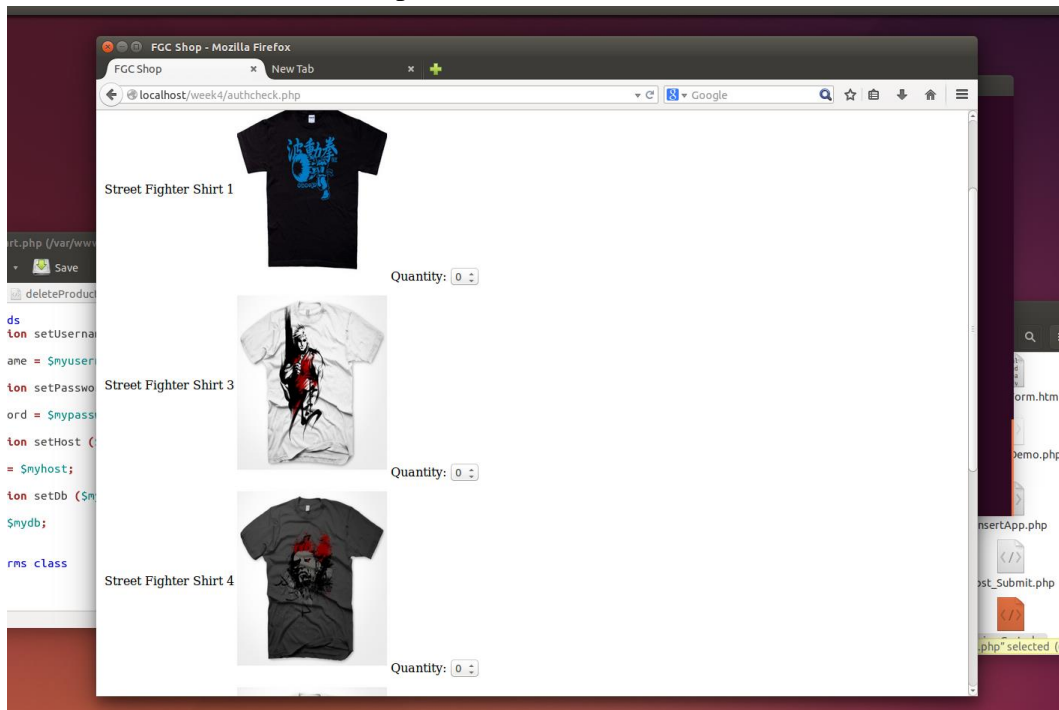

A 5<sup>th</sup> product is added to the database.

This is the delete screen.

Shirt 2 was removed from the product list.

This is the purchase screen. User will input purchase details here.

Your Cart - Mozilla Firefox

Your Cart x New Tab x +

localhost/week4/viewCart.php

[Continue to store page.](#)

Item	Quantity
Shirt 3	3

Total: \$ 60

Complete the information in the form below and click Submit to purchase. All fields are required.

First Name:	Justin
Last Name:	Wheeler
Street:	2222 Cra Cray
City:	Cray
State:	MS
Zip Code:	48880
Phone:	999000111
Credit Card #:	121212323243432112
Credit Card type (Visa,Mastercard):	Visa
Card Expiration Date:	12/12
Items Purchased:	
<input type="button" value="Purchase"/>	

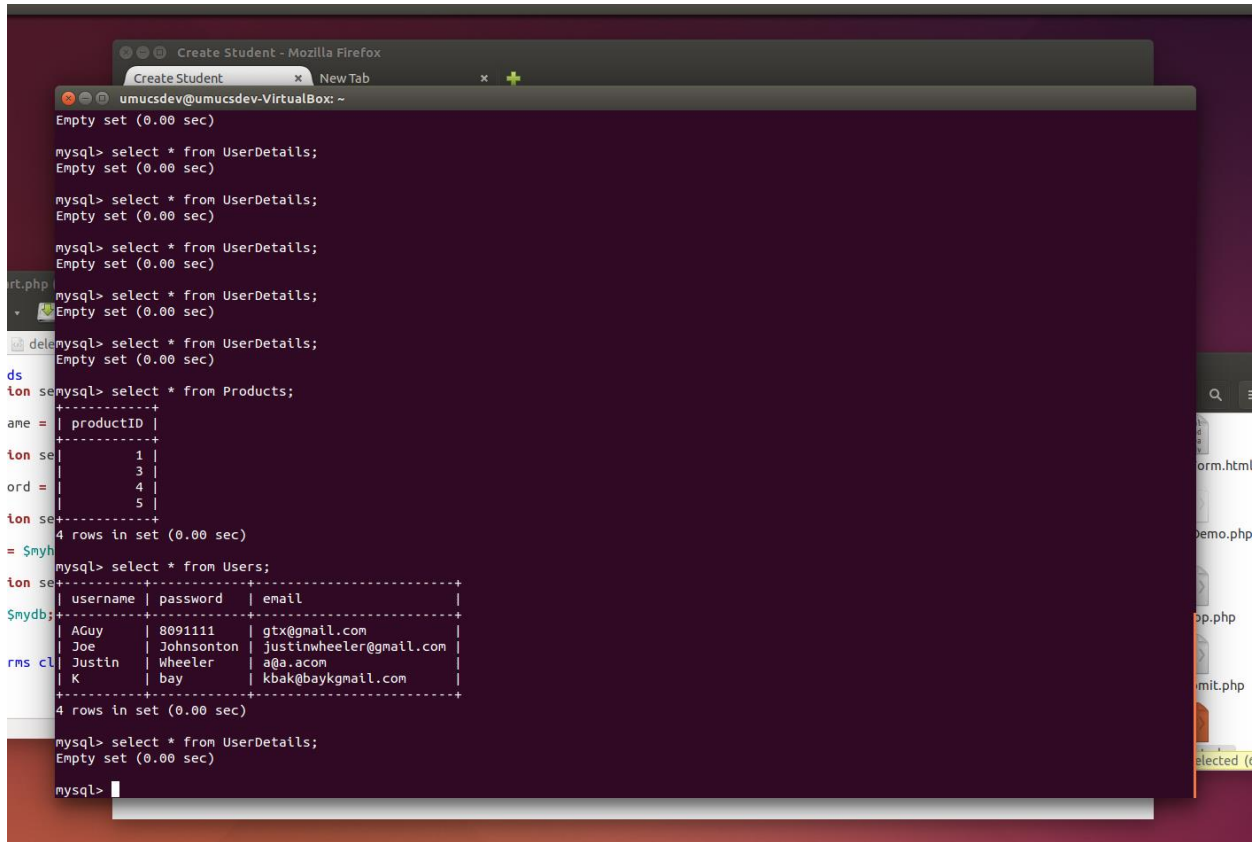

Purchase Complete! - Mozilla Firefox

Purchase Complete! x New Tab x +

localhost/week4/purchase.php

**Thank you for your purchase!**

I could get all functioning but the requirement for storing creditcard/user info on the purchase screen. The database below reflects the screenshots above.

The screenshot shows a terminal window titled 'umucsdev@umucsdev-VirtualBox: ~' with a background of a dark purple terminal. The terminal displays several MySQL queries and their results. The queries are as follows:

```
mysql> select * from UserDetails;
Empty set (0.00 sec)

mysql> select * from UserDetails;
Empty set (0.00 sec)

mysql> select * from UserDetails;
Empty set (0.00 sec)

mysql> select * from UserDetails;
Empty set (0.00 sec)

mysql> select * from UserDetails;
Empty set (0.00 sec)

mysql> select * from Products;
+-----+
| productID |
+-----+
| 1          |
| 3          |
| 4          |
| 5          |
+-----+
4 rows in set (0.00 sec)

mysql> select * from Users;
+-----+
| username | password | email |
+-----+
| AGuy     | 8091111 | gtx@gmail.com |
| Joe      | Johnson | justinwheeler@gmail.com |
| Justin   | Wheeler | a@a.a.com |
| K        | bay     | kbak@baykgmail.com |
+-----+
4 rows in set (0.00 sec)

mysql> select * from UserDetails;
Empty set (0.00 sec)

mysql>
```

The terminal also shows a file explorer on the left side with the following files:

- rt.php
- delem
- ds
- ton se
- ame =
- ton se
- ord =
- ton se
- = \$myh
- ton se
- \$mydb;
- rms cl

The file explorer on the right side shows the following files:

- orm.html
- demo.php
- pp.php
- mit.php
- ected (
